Summary

Full Stack Developer specializing in MERN stack with experience building scalable web applications and RESTful APIs. Strong foundation in backend development, authentication systems, database design, and performance optimization. Passionate about solving complex problems and building production-ready software systems.

Technical Skills

Languages: JavaScript (ES6+), Java, Python
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication
Database: MongoDB, PostgreSQL, MySQL
Deployment: Vercel, Render, AWS EC2 (Basic)
Tools: Git, GitHub, Postman, Socket.io

Projects

Bluelith Business Platform — React.js, Node.js, MongoDB 2026

Live: [Live Demo](#) — [GitHub: Repository](#)

- Developed production-ready responsive web platform deployed for live business usage.
- Improved page load speed by 35% through optimized React component rendering and lazy loading.
- Designed RESTful APIs and implemented backend data validation using Express.js.
- Deployed frontend on Vercel and backend on Render with secure environment configuration.

PromptCraft AI — MERN Stack + AI APIs 2025

Live: [Live Demo](#) — [GitHub: Repository](#)

- Built AI-powered SaaS platform supporting article generation, resume writing, image generation, and background removal.
- Integrated Google Gemini API for dynamic content generation and Clipdrop API for AI-based background removal.
- Implemented asynchronous request handling and structured prompt engineering for efficient AI response processing.
- Developed secure JWT-based authentication with protected routes and role-based access control.
- Designed modular backend architecture following MVC pattern with scalable API integration and structured middleware.

Real-Time Chat Application — MERN + Socket.io 2025

Live: [Live Demo](#) — [GitHub: Repository](#)

- Engineered WebSocket-based real-time messaging system with <200ms average latency.
- Designed optimized MongoDB schema improving message retrieval efficiency by 30%.
- Built REST APIs for authentication and chat persistence using Express.js.

Data Structures & Core CS

- Solved 200+ DSA problems on LeetCode and GeeksforGeeks.
- Strong in Arrays, Strings, Linked List, Stack, Queue, Trees, Graphs.
- Good understanding of Time & Space Complexity, OOPS, DBMS fundamentals.

Education

Bachelor of Technology (Computer Science)
Jodhpur Institute of Engineering & Technology

Aug 2021 – May 2025
CGPA: 7.68
